

2-1: Using Variables in PL/SQL

Vocabulary

1.Variables

2.Parameters

Try It / Solve It

1.

A.SUBPROGRAM

B.DECLARATIVE

C.PARAMETERS

2.

number_of_copies PLS_INTEGER; —VALID

printer_name CONSTANT VARCHAR2(10);—INVALID nu poate fi constanta un
caracter

deliver_to VARCHAR2(10) := Johnson; —INVALID lipseste ‘ ‘

by_when DATE := SYSDATE+1; —VALID

3.

A.The block will execute successfully and print ‘ fernandez’.

4.

5.

declare

v_country_name varchar2(40):='Japan';

v_country_highest_elevation number;

v_country_lowest_elevation number;

begin

select LOWEST_ELEVATION,HIGHEST_ELEVATION

into v_country_lowest_elevation ,v_country_highest_elevation

from wf_countries

where country_name=v_country_name;

DBMS_OUTPUT.PUT_LINE('The lowest elevation for '||v_country_name||' is:'||
v_country_lowest_elevation);

DBMS_OUTPUT.PUT_LINE('The highest elevation for '||v_country_name||' is:'||
v_country_highest_elevation);

end;
